

CONTENTS

Title and author(s)	pages
EDITORIAL 1. Introducing <i>CERAPIE</i> <i>G. Tsaparlis</i>	1-3
REVIEWERS OF <i>CERAPIE</i>	4
EDITORIAL 2. Chemistry and science education versus education: A top-down and bottom-up relation <i>G. Tsaparlis</i>	5-7
<hr/>	
INVITED CONTRIBUTIONS	
Teaching of chemistry - Logical or psychological? <i>A.H. Johnstone</i>	9-15
Should chemistry lessons be more intellectually challenging? <i>H.-J. Schmidt</i>	17-26
(Report from a workshop)	
Quality criteria for research papers on science education: How can they be used to improve manuscripts submitted for publication? <i>O. de Jong, H.-J. Schmidt, & U. Zoller</i>	27-30
(Invited research communication)	
Science teachers' awareness of findings from education research <i>N. Costa, L. Marques, & R. Kempa</i>	31-36
<hr/>	
RESEARCH REPORTS	
Teaching lower-secondary chemistry with a piagetian constructivist and an ausbelian meaningful-receptive method: A longitudinal comparison <i>E. Zarotiadou & G. Tsaparlis</i>	37-50
The teaching of chemistry: Who is the learner? <i>A. Goodwin</i>	51-60

Travaux pratiques en chimie et representation de la reaction chimique par l'equation-bilan dans les registres macroscopique et microscopique: Une etude en classe de seconde (15 – 16 ans) <i>A. Laugier & A. Dumon</i>	61-75
Developing students' understanding of chemical change: What should we be teaching? <i>P. Johnson</i>	77-90
How to teach the concept of heat of reaction: A study of prospective teachers' initial ideas <i>O. de Jong</i>	91-96
Water in context: Many meanings for the same word <i>M.A. Pedrosa & M.H. Dias</i>	97-107
Computerized molecular modeling - The new technology for enhancing model perception among chemistry educators and learners <i>N. Barnea & Y. J. Dori</i>	109-120
Use of the Internet in the teaching of chemistry in Finnish schools: A case study <i>I. Varjola</i>	121-128

RESEARCH COMMUNICATION

Evaluation of different strategies for the effective use of the World Wide Web in the learning and teaching of university level chemistry <i>P.C. Yates</i>	129-133
--	---------

THE PRACTICE OF CHEMISTRY EDUCATION: PAPERS

On the use of concept maps at different stages of chemistry teaching <i>D. Sisovic & S. Bojovic</i>	135-144
Gaseous equilibria: Some overlooked aspects <i>C. Giomini, G. Marrosu, M.E. Cardinali, & A. Paolucci</i>	145-149
Ionic equilibrium calculations: A problem solving approach <i>L. Cardellini</i>	151-160
The states-of-matter approach (<i>SOMA</i>) to introductory chemistry <i>G. Tsaparlis</i>	161-168

CONTENTS

The chemistry graduate destined for employment but with no experience of it. 169-174
Does it make sense?
R.G. Wallace

THE PRACTICE OF CHEMISTRY EDUCATION: NOTES

The chemistry of photography in full daylight 175-177
C.P. Hadjiantoniou-Maroulis & A.J. Maroulis

Updated inorganic and organometallic laboratory course for junior chemistry 179-182
students
L. Szepes, A. Kotschy, & G. Vass

GUIDELINES FOR SUBMISSIONS 183-185
