

**AUTHOR INDEX, VOLUME 1, 2000**

- Ambusaidi, A.* (with *A.H. Johnstone*). Fixed response: What are we testing?: (3) 323-328.
- Bargellini, A.* Towards a school of specialization for chemistry teachers in Italy: The Tuscan experience: (2) 303-311.
- Barke, H.-D.* (with *C. Hilbing*). An idea of science: Attitudes towards chemistry and chemical education expressed by artistic paintings: (3) 365-374.
- Barnea, N.* (with *Y.J. Dori*). Computerized molecular modeling - The new technology for enhancing model perception among chemistry educators and learners: (1) 109-120.
- Bojovic, S.* (with *D. Sisovic*). On the use of concept maps at different stages of chemistry teaching: (1) 135-144.
- Bojovic, S.* (with *D. Sisovic*). Approaching the concepts of acids and bases by cooperative learning: (2) 263-275.
- Cachapuz, A.* (with *M.F. Paixão*). Mass conservation in chemical reactions: The development of an innovative teaching strategy based on the history and philosophy of science: (2) 201-215.
- Cardellini, L.* Ionic equilibrium calculations: A problem solving approach: (1) 151-160.
- Cardinali, M.E.* (with *C. Giomini, G. Marrosu, & A. Paolucci*). Gaseous equilibria: Some overlooked aspects: (1) 145-149.
- Costa, N.* (with *L. Marques, & R. Kempa*). Science teachers' awareness of findings from education research: (1) 31-36.
- de Jong, O.* (with *H.-J. Schmidt, & U. Zoller*). Quality criteria for research papers on science education: How can they be used to improve manuscripts submitted for publication?: (1) 27-30.
- de Jong, O.* How to teach the concept of heat of reaction: A study of prospective teachers' initial ideas: (1) 91-96.
- Dias, M.H.* (with *M.A. Pedrosa*). Water in context: Many meanings for the same word: (1) 97-107.
- Dias, M.H.* (with *M.A. Pedrosa*). Chemistry textbook approaches to chemical equilibrium and student alternative conceptions: (2) 227-236.
- Dori, Y.J.* (with *N.Barnea*). Computerized molecular modeling - The new technology for enhancing model perception among chemistry educators and learners: (1) 109-120.
- Dumon, A.* (with *A. Laugier*). Travaux pratiques en chimie et representation de la reaction chimique par l'equation-bilan dans les registres macroscopique et microscopique: Une etude en classe de seconde (15 - 16 ans): (1) 61-75.
- Georgiadou, A.* (with *G. Tsaparlis*). Chemistry teaching in lower secondary school with methods based on: a) psychological theories; b) the macro, representational, and submicro levels of chemistry: (2) 217-226.
- Giomini, C.* (with *G. Marrosu, M.E. Cardinali, & A. Paolucci*). Gaseous equilibria: Some overlooked aspects: (1) 145-149.
- Goodwin, A.* The teaching of chemistry: Who is the learner?: (1) 51-60.
- Hadjiantoniou-Maroulis, C.P.* (with *A.J. Maroulis*). The chemistry of photography in full daylight: (1) 175-177.

- Hilbing, C.* (with *H.-D. Barke*). An idea of science: Attitudes towards chemistry and chemical education expressed by artistic paintings: (3) 365-374.
- Johnson, P.* Developing students' understanding of chemical change: What should we be teaching?: (1) 77-90.
- Johnstone, A.H.* Teaching of chemistry - Logical or psychological?: (1) 9-15.
- Johnstone, A.H.* (with *A. Ambusaidi*). Fixed response: What are we testing?: (3) 323-328.
- Kampourakis, K.* (with *G. Tsaparlis*). An integrated physical-science (physics and chemistry) introduction for lower-secondary level (grade 7): (2) 281-294.
- Kempa, R.* (with *N. Costa & L. Marques*). Science teachers' awareness of findings from education research: (1) 31-36.
- Kotschy, A.* (with *L. Szepes & G. Vass*). Updated inorganic and organometallic laboratory course for junior chemistry students: (1) 179-182.
- Laugier, A.* (with *A. Dumon*). Travaux pratiques en chimie et representation de la reaction chimique par l'equation-bilan dans les registres macroscopique et microscopique: Une etude en classe de seconde (15 – 16 ans): (1) 61-75.
- Leontidis, E.* (with *C.R. Theocharis*). A new chemistry curriculum in a newly founded university: Design under constraints: (2) 295-302.
- Maroulis, A.J.* (with *C.P. Hadjiantoniou-Maroulis*). The chemistry of photography in full daylight: (1) 175-177.
- Marques, L.* (with *N. Costa & R. Kempa*). Science teachers' awareness of findings from education research.: (1) 31-36.
- Marrosu, G.* (with *C. Giomini, M.E. Cardinali, & A. Paolucci*). Gaseous equilibria: Some overlooked aspects.: (1) 145-149.
- Niaz, M.* (with *M. A. Rodríguez*). Teaching chemistry as rhetoric of conclusions or heuristic principles - A history and philosophy of science perspective: (3) 315-322.
- Paixão, M.F.* (with *A. Cachapuz*). Mass conservation in chemical reactions: The development of an innovative teaching strategy based on the history and philosophy of science: (2) 201-215.
- Paolucci, A.* (with *C. Giomini, G. Marrosu, & M.E. Cardinali*). Gaseous equilibria: Some overlooked aspects.: (1) 145-149.
- Papageorgiou, G.* (with *D. Sakka*). Primary school teachers' views on fundamental chemical concepts: (2) 237-247.
- Pedrosa, M.A.* (with *M.H. Diaz*). Water in context: Many meanings for the same word: (1) 97-107.
- Pedrosa, M.A.* (with *M.H. Diaz*). Chemistry textbook approaches to chemical equilibrium and student alternative conceptions: (2) 227-236.
- Ragkousis, A.* Dyslexic students in chemistry classes: Their difficulties with chemical formulae: (2) 277-280.
- Reid, N.* The presentation of chemistry logically driven or applications-led?: (3) 381-392.
- Rodríguez, M.A.* (with *M. Niaz*). Teaching chemistry as rhetoric of conclusions or heuristic principles - A history and philosophy of science perspective: (3) 315-322.
- Sakka, D.* (with *G. Papageorgiou*). Primary school teachers' views on fundamental chemical concepts: (2) 237-247.
- Schmidt, H.-J.* Should chemistry lessons be more intellectually challenging?: (1) 17-26.
- Schmidt, H.-J.* (with *O. de Jong, & U. Zoller*). Quality criteria for research papers on science

- education: How can they be used to improve manuscripts submitted for publication?: (1) 27-30.
- Sigalas, M.P.* (with *C. Tzougraki, G. Tsaparlis, & N. Spyrellis*). 'Chemical Education and New Educational Technologies': An inter-university programme for graduate studies: (3) 405-410.
- Sisovic, D.* (with *S. Bojovic*). On the use of concept maps at different stages of chemistry teaching: (1) 135-144.
- Sisovic, D.* (with *S. Bojovic*). Approaching the concepts of acids and bases by cooperative learning: (2) 263-275.
- Spyrellis, N.* (with *C. Tzougraki, M.P. Sigalas, & G. Tsaparlis*). 'Chemical Education and New Educational Technologies': An inter-university programme for graduate studies: (3) 405-410.
- Stamovlasis, D.* (with *G. Tsaparlis*). Non-linear analysis of effect of working-memory capacity on organic-synthesis problem-solving: (3) 375-380.
- Stamovlasis, D.* Teaching chemometrics with photography experiments in a university-level course on experimental design: (3) 393-399.
- Szepes, L.* (with *A. Kotschy, & G. Vass*). Updated inorganic and organometallic laboratory course for junior chemistry students: (1) 179-182.
- Taber, K.S.* (with *M. Watts*). Learners' explanations for chemical phenomena: (3) 329-353.
- Theocharis, C.R.* (with *E. Leontidis*). A new chemistry curriculum in a newly founded university: Design under constraints: (2) 295-302.
- Tsaparlis, G.* Introducing *CERAPIE* (Editorial): (1) 1-3.
- Tsaparlis, G.* Chemistry and science education versus education: A top-down and bottom-up relation (Editorial): (1) 5-7.
- Tsaparlis, G.* (with *E. Zarotiadou*). Teaching lower-secondary chemistry with a piagetian constructivist and an ausbelian meaningful-receptive method: A longitudinal comparison: (1) 37-50.
- Tsaparlis, G.* The states-of-matter approach (*SOMA*) to introductory chemistry: (1) 161-168.
- Tsaparlis, G.* The quality of *CERAPIE*: Aiming to strike a balance (Editorial): (2) 187-188.
- Tsaparlis, G.* (with *A. Georgiadou*). Chemistry teaching in lower secondary school with methods based on: a) psychological theories; b) the macro, representational, and submicro levels of chemistry: (2) 217-226.
- Tsaparlis, G.* (with *K. Kampourakis*). An integrated physical-science (physics and chemistry) introduction for lower-secondary level (grade 7): (2) 281-294.
- Tsaparlis, G.* *CERAPIE and the EC(RI)CEs* (Editorial): (3) 313-314.
- Tsaparlis, G.* (with *D. Stamovlasis*). Non-linear analysis of effect of working-memory capacity on organic-synthesis problem-solving: (3) 375-380.
- Tsaparlis, G.* (with *C. Tzougraki, M.P. Sigalas, & N. Spyrellis*). 'Chemical Education and New Educational Technologies': An inter-university programme for graduate studies: (3) 405-410.
- Tzougraki, C.* (with *M.P. Sigalas, G. Tsaparlis, & N. Spyrellis*). 'Chemical Education and New Educational Technologies': An inter-university programme for graduate studies: (3) 405-410.
- Valanides, N.* Primary student teachers' understanding of the particulate nature of matter and its transformations during dissolving: (2) 249-262.
- Valanides, N.* Primary student teachers' understanding of the process and effects of distillation: (3) 355-364
- Varjola, I.* Use of the Internet in the teaching of chemistry in Finnish schools: A case study.: (1) 121-128.
- Vass, G.* (with *L. Szepes & A. Kotschy*). Updated inorganic and organometallic laboratory course for junior chemistry students: (1) 179-182.
- Viossat, V.* Periodic table software for high school (second edition): (3) 401-404.
- Wallace, R.G.* The chemistry graduate destined for employment but with no experience of it. Does it make sense?: (1) 169-174.

*Watts, M.* (with *K.S. Taber*). Learners' explanations for chemical phenomena: (3) 329-353.

*Yates, P.C.* Evaluation of different strategies for the effective use of the World Wide Web in the learning and teaching of university level chemistry: (1) 129-133.

*Zarotiadou, E.* (with *G. Tsaparlis*). Teaching lower-secondary chemistry with a piagetian constructivist and an ausbelian meaningful-receptive method: A longitudinal comparison: (1) 37-50.

*Zoller, U.* (with *O. de Jong & H.-J. Schmidt*). Quality criteria for research papers on science education: How can they be used to improve manuscripts submitted for publication?: (1) 27-30.

*Zoller, U.* Interdisciplinary systemic *HOCS* development – The key for meaningful *STES* oriented chemical education: (2) 189-200.
