RESEARCH REPORTS (EMPIRICAL STUDIES)	
Learning science through English: An investigation of the vocabulary skills of native and non-native English speakers in international schools <i>P.E. Childs & F.J. O'Farrell</i>	233-247
Lost without trace or not brought to mind? - A case study of remembering and forgetting of college science <i>K.S. Taber</i>	249-277
Students' difficulties in understanding of the conservation of matter in open and closed-system chemical reactions <i>H. Ozmen & A. Ayas</i>	279-290
A longitudinal study on 10-12 years-olds' conceptions of the transformations of matter <i>O. Eskilsson & G. Helldèn</i>	291-304
Students' strategies in solving easy problems in stoichiometry. <i>H.J. Schmidt & C. Jignéus</i>	305-317
A study of the effect of a practical activity on problem solving in chemistry** <i>K. Kampourakis & G. Tsaparlis</i>	319-333
Résolution de problème et pratique expérimentale : Analyse du comportement des élèves en début de seconde <i>A. Laugier & A. Dumon</i>	335-352
** <i>This paper was handled editorially by associate editor Norman Reid.</i>	
THE PRACTICE OF CHEMISTRY EDUCATION: PAPERS	
Design of activating digital learning material for food chemistry education <i>J. Diederer, H. Gruppen, R. Hartog, & A.G.J. Voragen</i>	353-371
Teaching information retrieval in the university curriculum <i>E. Mesko</i>	373-385

THE PRACTICE OF CHEMISTRY EDUCATION: REPORT

- How students perceive group problem solving: The case of a non-specialist chemistry class 387-395
Z.S. Seddigi & T.L. Overton
