

GUIDELINES FOR SUBMISSIONS

N.B. All those interested, please read carefully. In practice, most authors do not conform to guidelines; this causes extra work and delay. In particular, PAY ATTENTION TO THE FOLLOWING:

A. BEFORE YOU SUBMIT:

1. No publication fee will be imposed for Volume 4.
2. Articles must be original or review papers that:
 - a. Report science/chemistry education research results.
 - b. Review science/chemistry education research.
 - c. Report good practice of chemistry education, especially science-education-research informed practice. To this end, the paper must include references to science-education literature that supports the practice of chemistry education.
1. Language can be English or French.
2. Potential authors of CERP are advised to contact by e-mail the Editor, Georgios Tsaparis, about the suitability for CERP of their work: gtseper@cc.uoi.gr. Further, they can submit by e-mail their manuscript, as attached word file, so that the Editor and Associate Editors judge the suitability of the manuscript. If the manuscript is suitable, the corresponding author will be notified accordingly, and will be asked to send by e-mail (attached word file) or by standard mail (print copies) the required copies (including copies for anonymous review).

B. TO SUBMIT:

1. Include an abstract of no more than 200 words, plus a list of keywords.
2. Submit by mail (or by E-MAIL only if you have been notified so) four (4) paper copies of the manuscript, 1.5-lines-spaced, printed on BOTH FACES of A4 paper to the following address: Georgios Tsaparis (for CERP); Department of Chemistry, University of Ioannina, GR-451 10 Ioannina, Greece.
3. Please, fill-in and send together with the manuscript the SUBMISSION FORM which you will find at the end of this document, or directly using the relevant button on the left-hand column of first page of CERP. Pay attention to classify your manuscript into one of the following categories: (CHEMISTRY/SCIENCE EDUCATION) RESEARCH REPORT - RESEARCH COMMUNICATION (short report of preliminary or unpublished or work due to be published in extended form elsewhere) - REVIEW OF RESEARCH - SHORT REVIEW OF RESEARCH - PAPER or NOTE (short paper) or REPORT ON THE PRACTICE OF CHEMISTRY EDUCATION.

When copies will be received, the manuscript will be put to the standard review process. Note that, because potential reviewers must first be contacted and agree to act as reviewers, it may take some time before the review process starts. The corresponding author will be kept informed about the process.

Authors of original manuscripts who would like their work to be considered for publication in *CERP*, are invited to submit their manuscripts as follows:

Papers must be original. They should not have been published or being currently under consideration for publication elsewhere, and must be concerned with research in science and chemistry education or the classroom practice of chemical education. In the case of papers on *the practice of chemistry education*, priority will be given to papers that are *science-education-research informed*, that is, they are based on the findings of science and chemistry education research, as can be judged from references to related bibliography.

Language of the manuscripts must be either English or French. *An abstract and a list of key words in English is required in all cases (plus an abstract and key words in French if the language of the paper is French).* **Texts should be written in readable language**, without grammatical and spelling errors that may inhibit comprehension. In the case of English, *British or American spelling may be used*, but consistently. If necessary, please consult a person with good command of the language. This is a very important issue, because manuscripts written by non-native speakers are often poor as far as language is concerned. Note that *we do not demand a perfect use of the language, but expect contributions to be in a form that can be understood and easily be corrected/improved by reviewers.*

N.B. Manuscripts that do not have a clear educational content, lack in originality, have a poor presentation and/or methodology, and/or are difficult to comprehend because of poor language will NOT be put to the review process. It is recommended that potential authors (especially if in doubt) consult the Editor about suitability of their manuscripts, before submitting them.

CERP is not a profit-making publication. All cost so far is covered by the revenues of the 5th ECRICE. There will be **NO PUBLICATION FEE for all new submissions for Volumes 4 and 5.**

Please see published papers in *CERP* for the format and style of the text, the figures and tables, and in particular the references. Manuscripts that deviate from these guidelines, format and style, will be put in the review process, but authors will be notified to conform to the guidelines and resubmit their manuscripts after acceptance or on submission of a revised manuscript.

Submit by mail (or by E-MAIL only if you have been notified so) four (4) paper copies of the manuscript **1.5-spaced** printed on both faces of **A4 paper**, to the following address:

*Georgios Tsaparlis (for CERP);
Department of Chemistry, University of Ioannina, GR-451 10 Ioannina, Greece.*

| <ul style="list-style-type: none">- Page size: Standard A4, with both faces printed.- Margins: All 2.54 cm, justified.- Font: Times New Roman, size 12 (except the title: size 13, the abstract, key words, acknowledgments and address for correspondence, plus figures and tables: size 11).- Line spacing: 1,5 throughout.- The abstract should not exceed 200 words. |
|--|

THE REVIEW PROCESS

To maintain high standards of published work, as well as to ensure an objective evaluation of the manuscripts, all submissions (apart from manuscripts of papers presented in ECRICE Conferences) are reviewed anonymously. Authors then are requested not to mention in three (3) copies of the manuscripts their names and if necessary or desired the place and country of origin. Self-references should be made as follows: Author (a) has found that / It has been reported that (Author, b). In the references for journal articles, only the name of the journal may be mentioned (but not year, volume or title of article). The names of the conferences should not be given. For books, only the publisher must be mentioned.

Examples:

Author (a). Paper in Science Education or paper in international journal.

Author (b). Paper presented in International Conference.

Author (c). Book. Wiley.

Author (d). Chapter in book with collected papers. Wiley.

In the same spirit, references to national publications (journals or books) should be made as follows: Article not in English or (e.g.) in Greek; Book not in English or (e.g.) in Spanish;

Paper presented in Conference not in English or (e.g.) in Italian.

N.B. One copy of the manuscript must be complete with authors' names and full references.

The review process takes usually about two months, but considerable delays can be caused by not submitting the required number of copies and the signed submission form. In case a manuscript is rejected, authors are requested to avoid disputing reviewers' and/or the editor's judgments. Reviewers and the editor are not infallible. It is then recognised that the authors might be partially or entirely right and that the review process might be unjust to their work, but this is how things have to work. They can submit their work elsewhere: if their work is worth publishing it will eventually be accepted. Meanwhile, they would have gained the benefit of receiving useful feedback about their work.

On acceptance of a manuscript, authors will be requested to submit their final text (in the format of CERP, with figures and tables inserted in proper places within the text) in electronic form as attached file to gtseper@cc.uoi.gr. Please **DO NOT USE ANY OR USE AS FEW AS POSSIBLE SPECIAL FORMATTING PROCEDURES IN PREPARING ELECTRONICALLY THE MANUSCRIPT.**

TOGETHER WITH THE MANUSCRIPT, PLEASE FILL IN AND SEND THE FORMS ON THE FOLLOWING PAGE.

**CHEMISTRY EDUCATION:
RESEARCH AND PRACTICE (CERP)**

**FORM TO BE FILLED IN BY MAIN AUTHOR AND SUBMITTED TO CERP
TOGETHER WITH MANUSCRIPT**

REMINDER TO THE AUTHOR: Because CERP does not at present have any revenues, and its publication is so far covered by the revenues from 5th ECRICE, you are kindly requested to submit by *ordinary mail* FOUR (4) PRINT copies of the manuscript.* Three (3) of the copies must be prepared for anonymous review, that is authors' names should not appear anywhere in the text and in the references (USE AUTHOR instead).

* In addition, manuscripts sent by e-mail may not show properly (tables, figures, formulae, etc.).

TO REDUCE COST OF MAILING MANUSCRIPTS TO REVIEWERS, PLEASE USE 1.5 (NOT DOUBLE) SPACE, AND PRINT BOTH FACES OF THE A4 SHEETS.

Title of paper:

AUTHOR(S):

CORRESPONDING AUTHOR (include full postal address, fax, and e-mail)

CATEGORY OF PAPER AND MAXIMUM LENGTH

NOTE: Papers that contain exactly or almost exactly the same material with already published or to be published papers in OTHER JOURNALS and/or CONFERENCE PROCEEDINGS should not be submitted (but see also category 5 below). After the publication of their contribution in CERP, authors maintain the right to submit their work elsewhere: that is, there will be no copyright transfer.

Please state (tick) category of your paper

1. Full science/chemistry-education research unpublished* report (up to 25, 1.5-lines-spaced, A4 pages, including references, tables and figures).
2. Preliminary science/chemistry-education research unpublished* report (RESEARCH COMMUNICATION) (up to 8, 1.5-lines-spaced, A4 pages, including references, tables and figures).
3. Full unpublished* paper on the practice of chemistry education (up to 15, 1.5-lines-spaced, A4 pages, including references, tables and figures).
4. Short unpublished* paper (NOTE) on the practice of chemistry education (up to 7, 1.5-lines-spaced, A4 pages, including references, tables and figures).
5. Short own- science/chemistry-education research review paper** (up to 12, 1.5-lines-spaced, A4 pages, including references, tables and figures).
6. Long science/chemistry-education research review paper*** (up to 32, 1.5-lines-spaced, A4 pages, including references, tables and figures).
7. Report on the Practice of Chemistry Education (up to 10, 1.5-lines-spaced, A4 pages, including references, tables and figures).

* The paper in its present form or in slightly different form **has not been published** and is **not** at present **under consideration for publication elsewhere**. IT MAY HOWEVER BE PUBLISHED LATER IN ANOTHER JOURNAL. Please specify journal, when is expected to be published, which is the relation between the two papers, and reason for this communication to CERP.

.....
.....
.....

** The paper contains a short review of previous published papers of the author(s). For the details, references should be given to the published papers.

*** The paper makes a review of the relevant literature, including references to the author(s)' published relevant work.

IMPORTANT QUESTIONS:

(1) Has this paper been published in whole or in part in another journal? NO YES If YES, please specify journal and what part of it.

.....
....

(2) Has this paper been presented in a Conference? NO YES If YES, please specify, stating Conference and providing information about published or to be published Proceedings, as well as the relation of this manuscript to that of the Proceedings.
